My Story

Name: Novena Kahiki Dewald Date: Oct. 8, 2014

My reason for coming to Chirocare:

Fell at work on school ground Cascade High School in Everett, hit my right knee, slammed into railing, ^{and} ~~cut~~ under my nose, flipped head back, broke back ribs, injured right shoulder and arm.

How long I have been coming to Chirocare:

From Sept. 2013 til now and continue on.

The results I have had with treatment are:

My right shoulder injury was healed within 2 1/2 months with cold laser therapy, massage and chiropractic care. Now working on bottom of feet w/ cold laser therapy, massage, and foot adjustments. (Neuropathy caused by breaking back-bar across back causes pressure in lower back, tail bone, and feet. Laser helping a lot w/ numbness feeling in feet (not diabetes) - tried Physical and occupational therapy for months first. I am so happy and thankful Dr. Kantor's office called me when was in car accident. But when I broke my back, I called to come in, set up appointment and have been coming in 3x's a week to get back on my feet! Doing tractions is what has helped in gaining my balance, pulled my inner organs in place (yeah!), and helping me to gain my confidence in walking better, with hopes of getting stronger each day.

Dr. Doron Kantor, D.C.
Chirocare
9528 State Ave, Suite B
Marysville, WA 98270-2236

Dear Dr. Doron:

Thank you very much for suggesting the use of the cold laser therapy for my knees. The results have been amazing. As you know, I had a total knee replacement on my right knee in 2005 and a partial replacement on the left knee in 2012. These surgeries allowed my knees to work OK, but the pain never stopped, and no one knows why. After treatments with your laser system, I estimate that the pain has diminished by 70-80-% or more! You don't know what a blessed relief it is to be almost pain free in my knees. Thank you.

I don't know how long the pain will be gone, that is something we will learn as time goes on. It may require a few "tune up" treatments from time to time. But to be almost pain free is wonderful. Thank you.

Sincerely,

Kenneth M. Cage

Here's my "short & sweet chiropractic story!"
Chiropractic care works! Dr. Kantor
has really helped my pain for my damaged
S.I. joints and lower back pain with twice
a week adjustments. I had four doctors
discourage me from seeing a chiropractor,

I went with my "gut instincts" and I
knew I was right. It's the best treatment
plan for me. I'm better with Dr. Kantor,
Together we will continue to further
~~my~~ my health for the better.

Thank you, Dr. Kantor

I'm Lonna Volson. I found
ChiroCare when
I read a flyer in the
newspaper about Cold Laser.
It said it could help knee
pain, so I thought I would
make an appointment +
find out what it was all
about. I had never been to
a chiropractor before so
I was pretty nervous +
skeptical. When I came
into the office, they were
busy, so I thought that
was good that other people
trusted them. Then it was
my turn... Everyone was
very welcoming + friendly
+ they made me feel at home
+ at ease. I am so glad
that I came to ChiroCare
because the cold laser treatment
are helping with my knee pain
already + I will definitely
have the other knee treated, too.

Name: Sreyngnet Long

Date: 10-8-14

My reason for coming to Chirocare:

knee pain & swelling

How long I have been coming to Chirocare:

about 5 weeks

The results I have had with treatment are:

Before I receive my treatment I feel pain within 10-15 minutes of walking. I feel & very unproductive because of the pain. I notice the immediate results within the first couple treatments. By the time I finish my treatment I still feel some pain, but I would say it's 99% improvement and the swelling has gone down. Now I can walk ~~to~~ long distances and ~~not~~ feel very little pain. I feel like I have gotten my life back. I am so happy and am very productive. I feel like I can do anything. Thank you Dr. Kantor and Staff for helping me feel myself again.

Name: Nancy Trammel

Date: 8-29-14

My reason for coming to Chirocare:

Neuropathy, Restless leg, LBP.

How long I have been coming to Chirocare:

I have had five visits so far.

The results I have had with treatment are:

The bottom of my feet used to feel like I'm walking on needles. I also felt like I was walking on foam rubber, so I wobbled while walking. I still feel like I'm standing on marbles sometimes but no longer feel the sharp needle-like pain. My low back pain is gone so far. I was able to stay on my feet for 12 hours at the fair! My restless leg habit really changed much, but I am able to be so active during the day now that I don't notice it. I only notice it now at night when I'm resting.
